

UPGRADE TO INFOGENESIS POS 4.0 & EXPERIENCE ALL THE POS-SIBILITIES:

Getting it right the first time is paramount in ensuring your upgrade goes smoothly. Prior to your scheduled upgrade we perform a vigorous pre-system upgrade test using your databases. It's specific and relevant to your upgrade and allows all our system health checks to be completed before we go to site.

We've created a simple path for your upgrade to InfoGenesis POS 4.0.

DAY 1 & 2:

System upgrade, configuration, testing and analysis. This upgrade testing procedure includes an end-to-end upgrade using all databases from your point of sale server

Location – InfoGenesis Offices

DAY 3:

System upgrade version 4.0 on server and point of sale terminals.

Begin historical data migration. Please note that the historical data migration will run over a period of one day (timeframe dependant on current data retention). Whilst the migration is running there is no impact to operations with pos terminals on-line.

Location – Onsite

DAY 4:

Finalise upgrade

Configuration and testing of all pre-existing interfaces

Universal Desktop installation onto client workstations

Location – Onsite

DAY 5:

Complete Data Migration of historical data into the new reporting tool

Undertake Health Check

Commence universal Desktop and Reports training for Power Users

Location – Onsite

Cost 5 Day Upgrade Plan, \$6900.00

To secure a date to upgrade to Version 4 please contact:
